WESTERN GANADA'S MARVELOUS CROP RETURNS

The increase in the crop returns of the Canadian West, in the pest seven years has approached the marvelous, a corresponding increase will not remany years to come. The increase has been particularly noticeable in what was formerly known as the September 1st, 1905, became the prov-inces of Alberta and Saskatchewan. From the official returns we find the to wheat, oats and barley, in the years mentioned, and a more favor-able showing cannot be pointed to in any other country during a like

every year except 1900, when there appears to have been a slump all along the line. This, however, was more than companyated for in the following year, when the bumper crop in wheat oats and barley put the returns of all previous years completely in the shade and gave an impetus to settlement in the west which has prevailed to the

It will be seen that the number of acres sown to wheat, outs and barley in 1898 was 429,749, and that this had increased in 1904 to 1,587,327. The total crop in the cereals mentioned was 9,033,297 bushels in 1898, and in 1904 it had grown to the magnificent total of 35,413,522. In the year just closed the "forward movement" in the agriculture of the west has been the wonder and envy of the world. New sections of the country have been placed under tribute to the plow and harrow, and the grain area has been largely increased. This is particularly the case where it has been onstrated that "Alberta Red" winter wheat may be successfully grown, and along the lines of the new rallways towards the centre of the coun-

CHAPTER V. A Trip to the Grand Canon. I stood pondering, for no explanatempt to gain a little reputation for pluck, if in any way I could have appearance of the robbers. Yet to suppose—which seemed the only other horn to the dilemma—that the son and guests of the vice president of the Missouri Western, and one of our own directors, would be concerned in train robbery was to believe something have put the whole thing down as a practical joke of Mr. Cullen's party, If it had not been for the loss of the registered letters. Even a practical joker would hardly care to go to the

length of cutting open government mail pouches; for Uncle Sam doesn't approve of such conduct. Whatever the explanation, I had enough facts to prevent me wasting more time on that alkali plain. Getting the men and horses back onto the cars, I jumped up on the tail-board and ordered the runner to pull out for Flagstaff. It was a run of seven hours, getting us in a little after eight, and in those I had done a lot of thinking which

"Yis, sah." "Then, it couldn't have been Mr. Cullen, Jim," I declared, "for I found him up at the other end of the car," "Tell you it was, Mr. Gordon," Jim insisted. "I done seen his face clar in de light, and he done go into Mr. Cullen's car whar the old gentleman
